PROFILE

I'm a Software Development student at SLIIT with a passion for building modern, user-friendly applications. I enjoy working across the full stack, from designing responsive frontends to developing efficient backend systems. I'm always learning new technologies and exploring creative ways to improve user experience.

EDUCATION

Bachelor of Science in Information Technology

Nov 2023 – Present

Sri Lanka Institute of Information Technology (SLIIT)

Advanced Level (A/L) – Ananda College, Colombo

Jul 2020 – Feb 2023

Economics (A), Accounting (A), Business Statistics (C), General English (B)

CERTIFICATIONS

British Council Upper Secondary 3 – Completed with excellent results

Mar 2020

TECHNICAL SKILLS

Languages: Java, Kotlin, JavaScript, PHP, HTML, CSS, SQL

Frameworks & Libraries: React.js, Node.js, Express.js, Android SDK

Databases: MongoDB, MySQL, SQL Server (SSMS)

Tools & Platforms: Git, GitHub, Android Studio, VS Code, POSTMAN, Playwright

PROJECTS

Ceylon Mart – Grocery Management System

MERN Stack

- Developed the User Management module including user registration, login, and role-based access control
- Implemented authentication and validation using modern web standards
- Used MongoDB, Express.js, React, and Node.js following modular and scalable coding practices

Smart Campus Operations Hub

React, Spring Boot, MongoDB

- Developed the **Resource Management module** with CRUD operations and filtering
- Built RESTful APIs and integrated frontend using Axios
- Implemented role-based access (Admin/Student)
- Followed scalable architecture with validation and error handling

Examination Management System

Java Servlets

- Developed a web-based system to manage examinations, students, and results
- Implemented MVC architecture and JDBC for database connectivity
- Designed and managed the database using MySQL with server-side validation and session management

STUEDU – Tutor Peer Management System

- Developed booking and session management features using MongoDB, Express.js, React, and Node.js
- Implemented real-time chat and session-based communication
- Applied validation logic to prevent double booking and invalid scheduling
- Conducted end-to-end testing using Playwright to ensure system reliability

Vehicle Rental System – User Management Module

HTML, CSS, JavaScript, PHP, SSMS

- Developed user registration, login, and logout functionality using PHP
- Applied server-side validation and performed CRUD operations using SQL queries
- Designed and managed the database using SQL Server Management Studio (SSMS)

University Lecture Management System

Android App – Kotlin

- Built an Android application to manage lecture schedules, attendance, and course information
- Implemented notifications and student–faculty interaction features following Android best practices

Habit Tracker

Android App – Kotlin

- Developed an Android application to track daily habits and build routines
- Implemented local data persistence using Shared Preferences with progress tracking and reminders
